**Additional Information**

We recommend using branded tungsten halogen lamps that incorporate internal fuses. The use of inferior, non-branded lamps may require the nominal rating of the dimmer to be reduced. When dimming low voltage lighting, this dimmer must be used with dimmable, leading edge transformers only. Always check compatibility prior to installation and if in doubt, seek advice with transformer manufacturer. We DO NOT recommend mixing electronic and magnetic transformers on the same dimmer switch. Ensure that the mains supply is isolated before commencing installation and refer to the circuit diagram supplied with the relevant product.
